

LED driver with integrated single LED monitoring for detection of individual defect LEDs at short circuit or open circuit. Freely programmable non-maintained (BL) and maintained (DL) operation for each individual luminaire without additional data line. Addressing with pre-programmed unique ID, no manual addressing. Luminaires individually switchable and dimmable via the emergency lighting system. High functional safety by compliance to international standards for safety and operation, electromagnetic compatibility and interference immunity. For connection to INOTEC systems with 24V circuits.
Replaceable power supply unit for easier maintenance and servicing.

Technical details

Material	polycarbonate
Protection category	IP20
Permitted temperature range	-15...+50 °C
Nominal voltage DC	24 V ±20 %
Input terminal	max. 2.5 mm ² single-core or max. 1.5mm ² multi-core with ferrule
Dim.	Length x Width x Height: 38 mm x 40 mm x 19 mm
Output current	650 mA
max connection capacity	5.8 W

L-JET 7 - max. 24V DC, 650mAconst

Art. no.: 101421479

Type of current	constant current
